Also, wrt C15 EOx (Ethoxylated Alcohol C15), they provided two spreadsheets that show the final values for samples analyzed on 5/10 and 5/14. But I don't have similar spreadsheets for these samples (below). I see that values are provided in the report for all these samples but the spreadsheets show the conversion that is required, to account for the surrogate recovery and it also had a good summary of spike results

These samples would have been analyzed on 4/25-26 and 4/30:

PGDW05-0412
PGDW20-0412
PGDW20d-0412
PGDW23-0412
EPAMW02-0412-1
PGDW30-0412
Field and Equipment Blanks 1 & 2

Steve,

I have looked through all the files from you that included the Las Vegas data. They include everything for the Ethoxylated compounds, and also the preparation information for the alkyl phenols and acrylamide.

But I don't see any analytical data for alkyl phenols and acrylamide. Sorry, but until I went through these in detail I didn't know what I had. This review is for all the files sent in the four emails.

I can write up my report on C15 EOx (Ethoxylated Alcohol C15) but need the analytical data for the other two analyses.

Please advise.

Thank you,

Dave
